RE: Temporary Part-time Employment Opportunities for Furloughed Federal Employees

- The temporary staffing agencies listed below have indicated they are willing to work with their employer networks in an effort to find part-time/temporary employment opportunities for ONG federal furloughed technicians. There are no guarantees on placement, but, the agencies have committed to priority placement.
- Federal furloughed employees interested in securing part-time/temporary employment are encouraged to contact the agencies listed below. When calling ask for the points of contact for each company and state that you have been referred by the Ohio National Guard Employment Support Office and would like assistance in looking for employment opportunities as it concerns the dates of your furlough. Furloughed technicians must work with their technician supervisors to negotiate work schedules (furlough days).
